Introduction

Increase in various health issues observed among adolescents during the resumption of face-to-face classes in 2022:

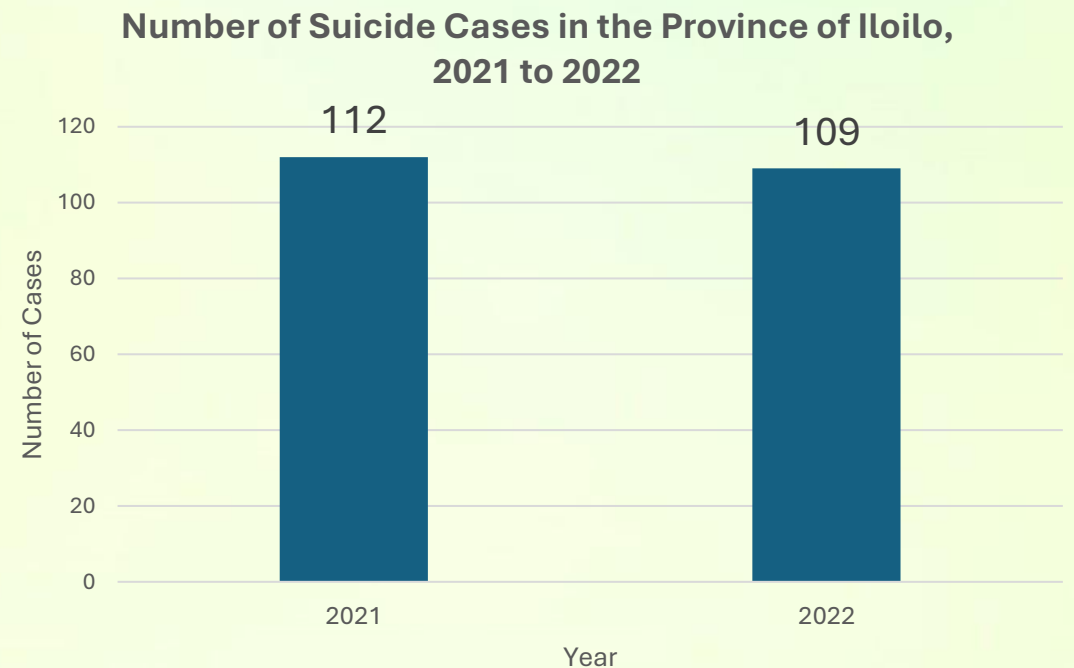

- High incidence of teenage pregnancy
- High number of suicide cases and other mental health issues
- High number of newly diagnosed HIV cases among youth aged 15 to 24 years old
- Low COVID-19 vaccination booster coverage

Number of Newly Diagnosed HIV Cases in the Province of Iloilo, 2022

Introduction

Increase in various health issues observed among adolescents during the resumption of face-to-face classes in 2022:

- High incidence of teenage pregnancy
- High number of suicide cases and other mental health issues
- High number of newly diagnosed HIV cases among youth aged 15 to 24 years old
- Low COVID-19 vaccination booster coverage

COVID-19 Vaccination Update as of October 21, 2022, 6AM

Age Group	1st Dose	%	2nd Dose	%	1st Booster	%	2nd Booster	%
5 - 11 yrs. old	149,098	79.63%	130,838	69.88%				
12 - 17 yrs. old	221,191	97.23%	204,687	89.97%	10,914	4.80%		
18 - 59 yrs. old	843,169	72.35%	798,263	68.50%	216,331	18.56%	15,007	1.29%
60 yrs. old and above	159,800	78.61%	153,195	75.36%	44,301	21.79%	4,853	2.39%

Introduction

Increase in various health issues observed among adolescents during the resumption of face-to-face classes in 2022:

- High incidence of teenage pregnancy
- High number of suicide cases and other mental health issues
- High number of newly diagnosed HIV cases among youth aged 15 to 24 years old
- Low COVID-19 vaccination booster coverage

Objectives

To collaborate with DepEd, Philippine Red Cross, USAID's ReachHealth Project, and other agencies to deliver a package of health services for adolescents, including informative lectures and medical services in selected secondary schools in the province, to achieve better health outcomes among the youth:

1. Establish a team from the Provincial Health Office and partner agencies to deliver the health services package;
2. Develop health education materials focusing on the most prevalent health issues identified among the learners;
3. Develop a reporting tool to monitor the project implementation;
4. Create a referral network between the schools and the LGU service providers.

Implementation Methods

Preparatory Oct. - Nov. 2022

- Creation of Planning & Implementation Team (PHO, Dep Ed, PRC, ReachHealth)
- Approval of topics and lecture materials by DepEd
- Endorsement of recipient schools by DepEd
- Coordination with recipient school and LGU

Field Implementation Nov. 2022 - Present

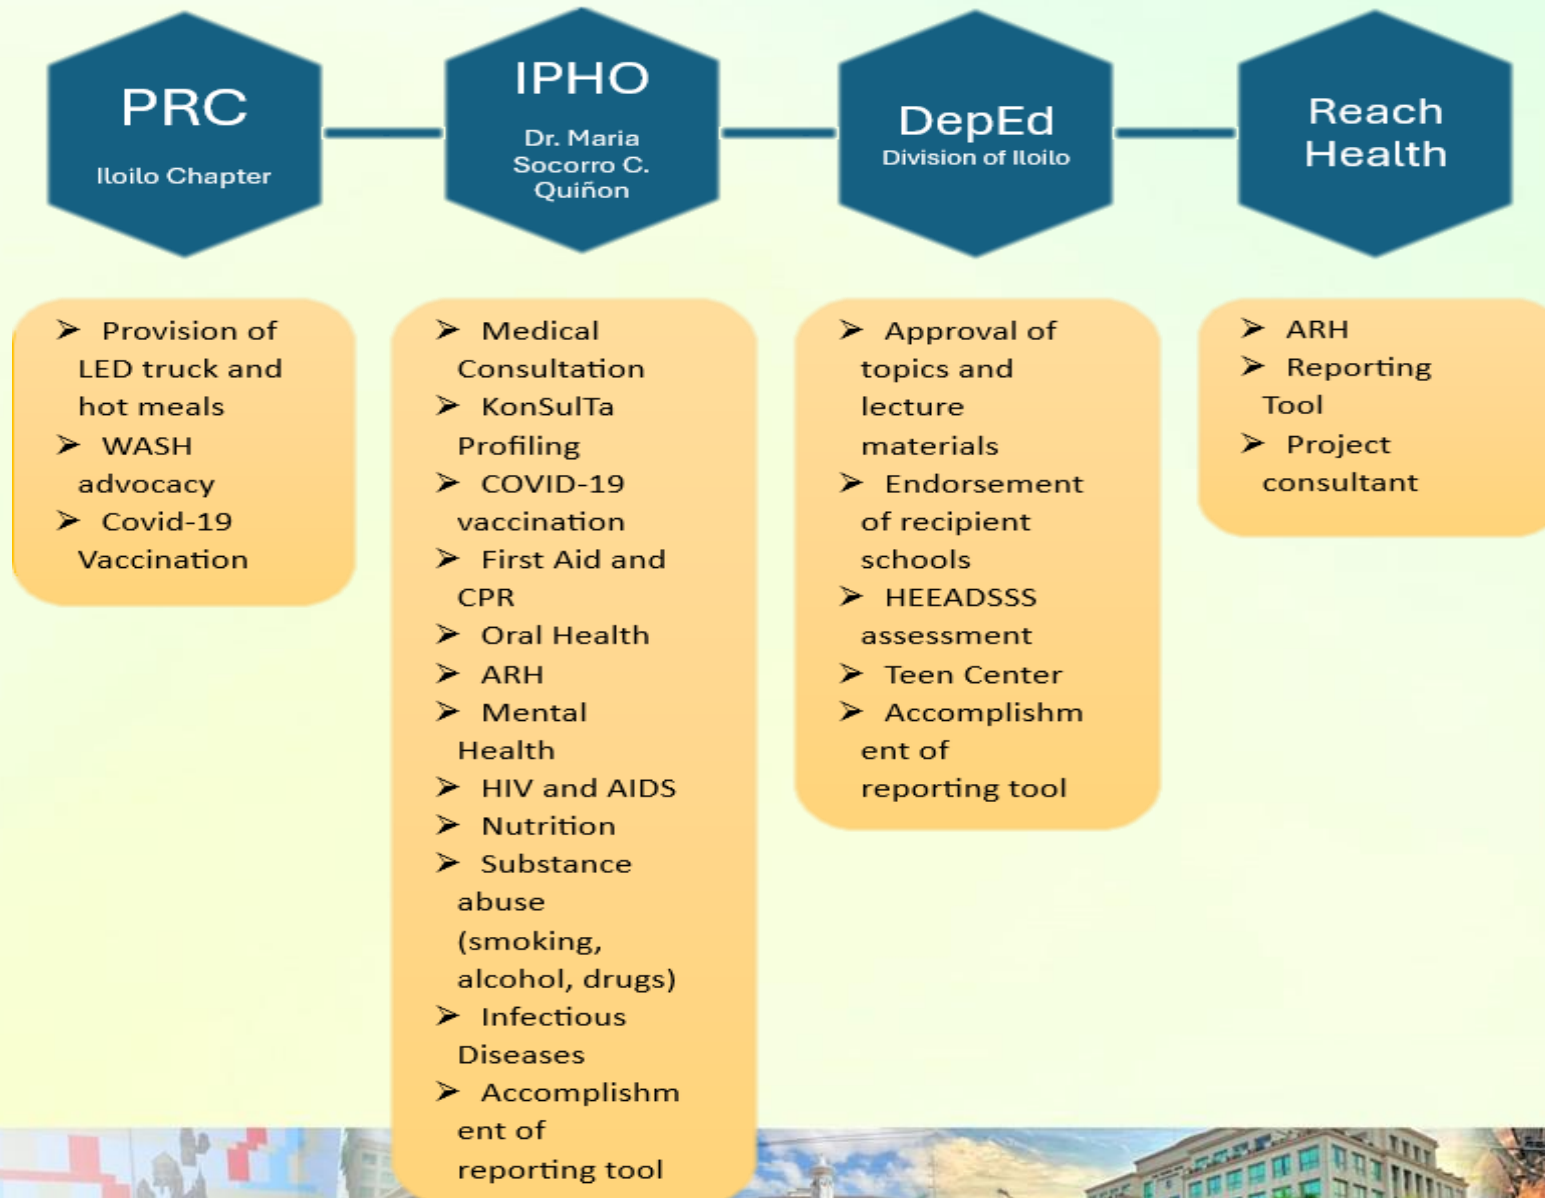

- Conduct of HEEADSSS assessment prior to the conduct of activity
- Conduct of Project Tib-ong Kabataan session in school
- Provision of services to identified clients
- Referral of cases to LGU service providers (RHU, MSWDO, PPO, MPS)

Feedbacking & Evaluation Nov. 2022 - Present

- Feedbacking session with school personnel, student representatives, LGU and project team
- Reporting of accomplishment
- Conduct of midterm implementation review
- Enhancement of the project based on the recommendations

Findings

33 schools visited
2 Barangays

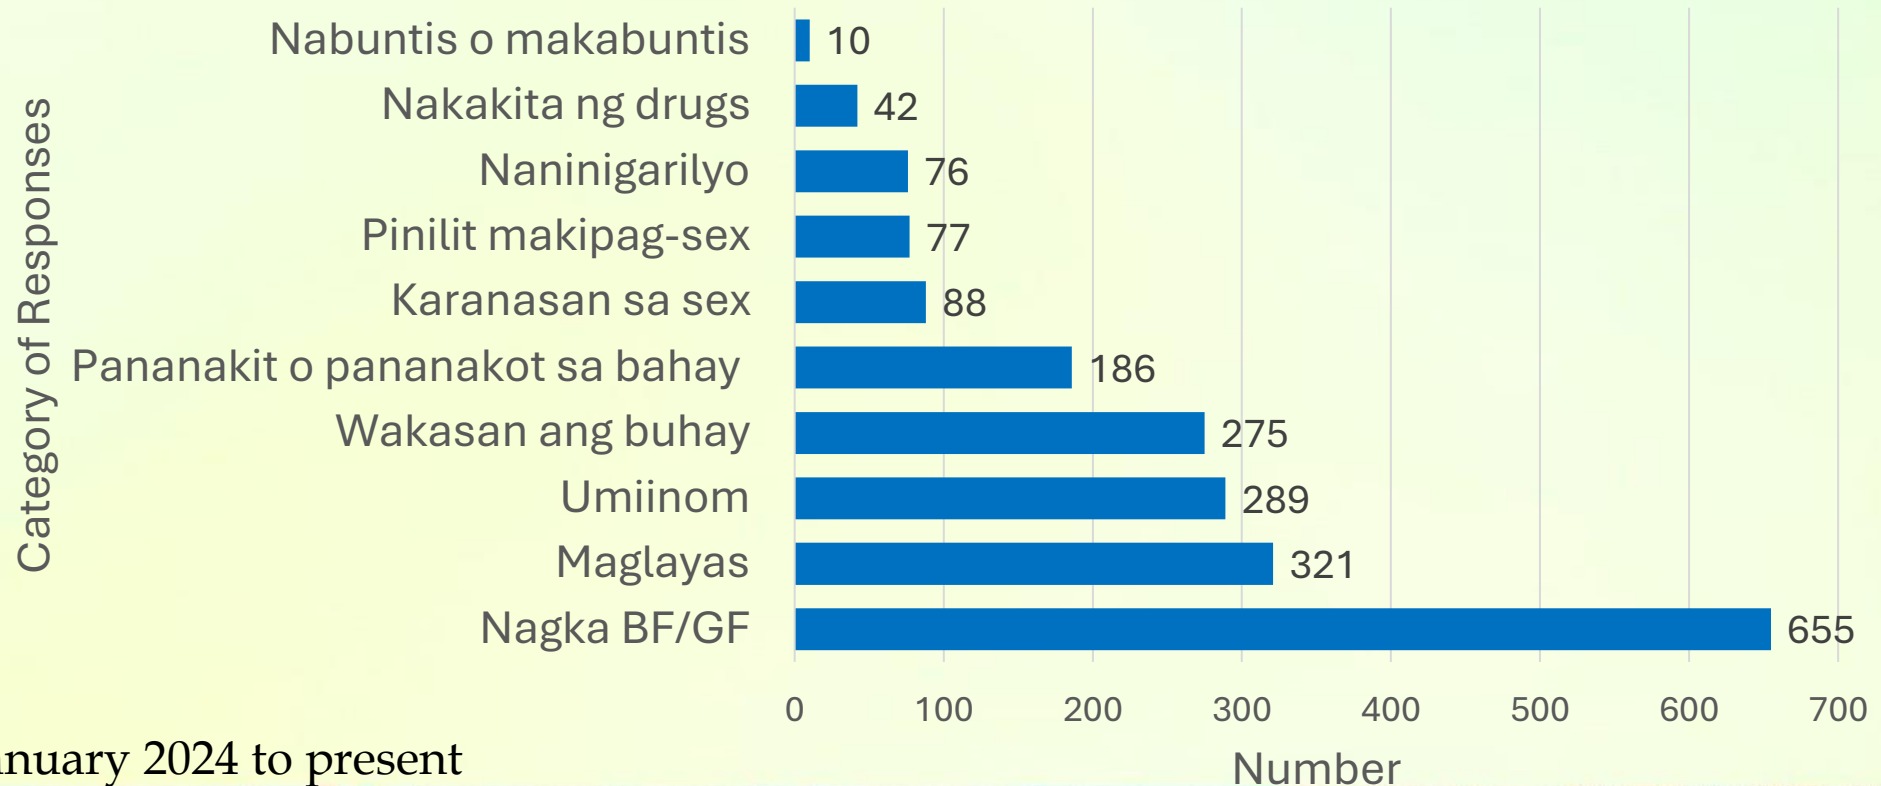

7,853 adolescents
reached

Covered period: November 2022 to present

Findings

Distribution of Rapid HEEADSSS Assessment Results in Selected Secondary Schools in Iloilo Province (N=1,119)

Covered period: January 2024 to present

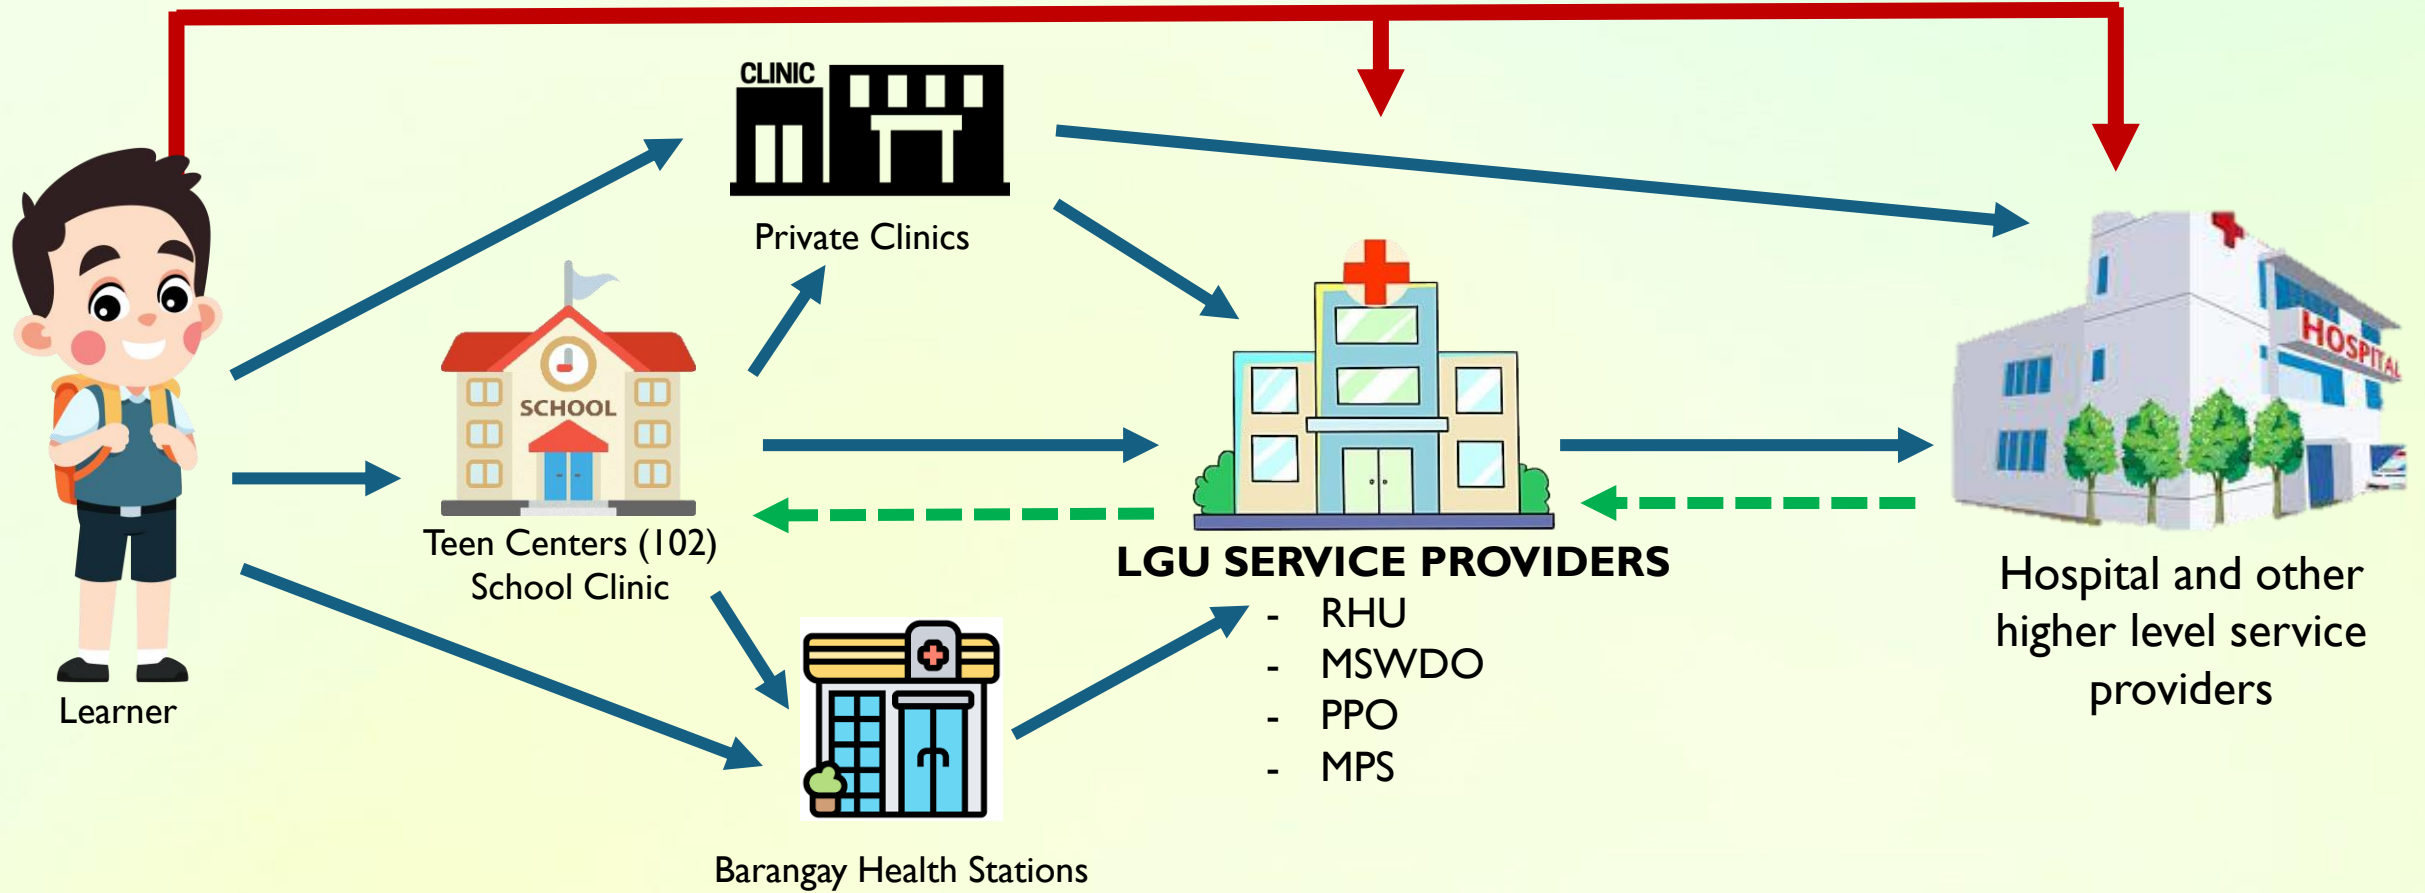

Findings

Distribution of cases based on the level of care received (N=1,119)

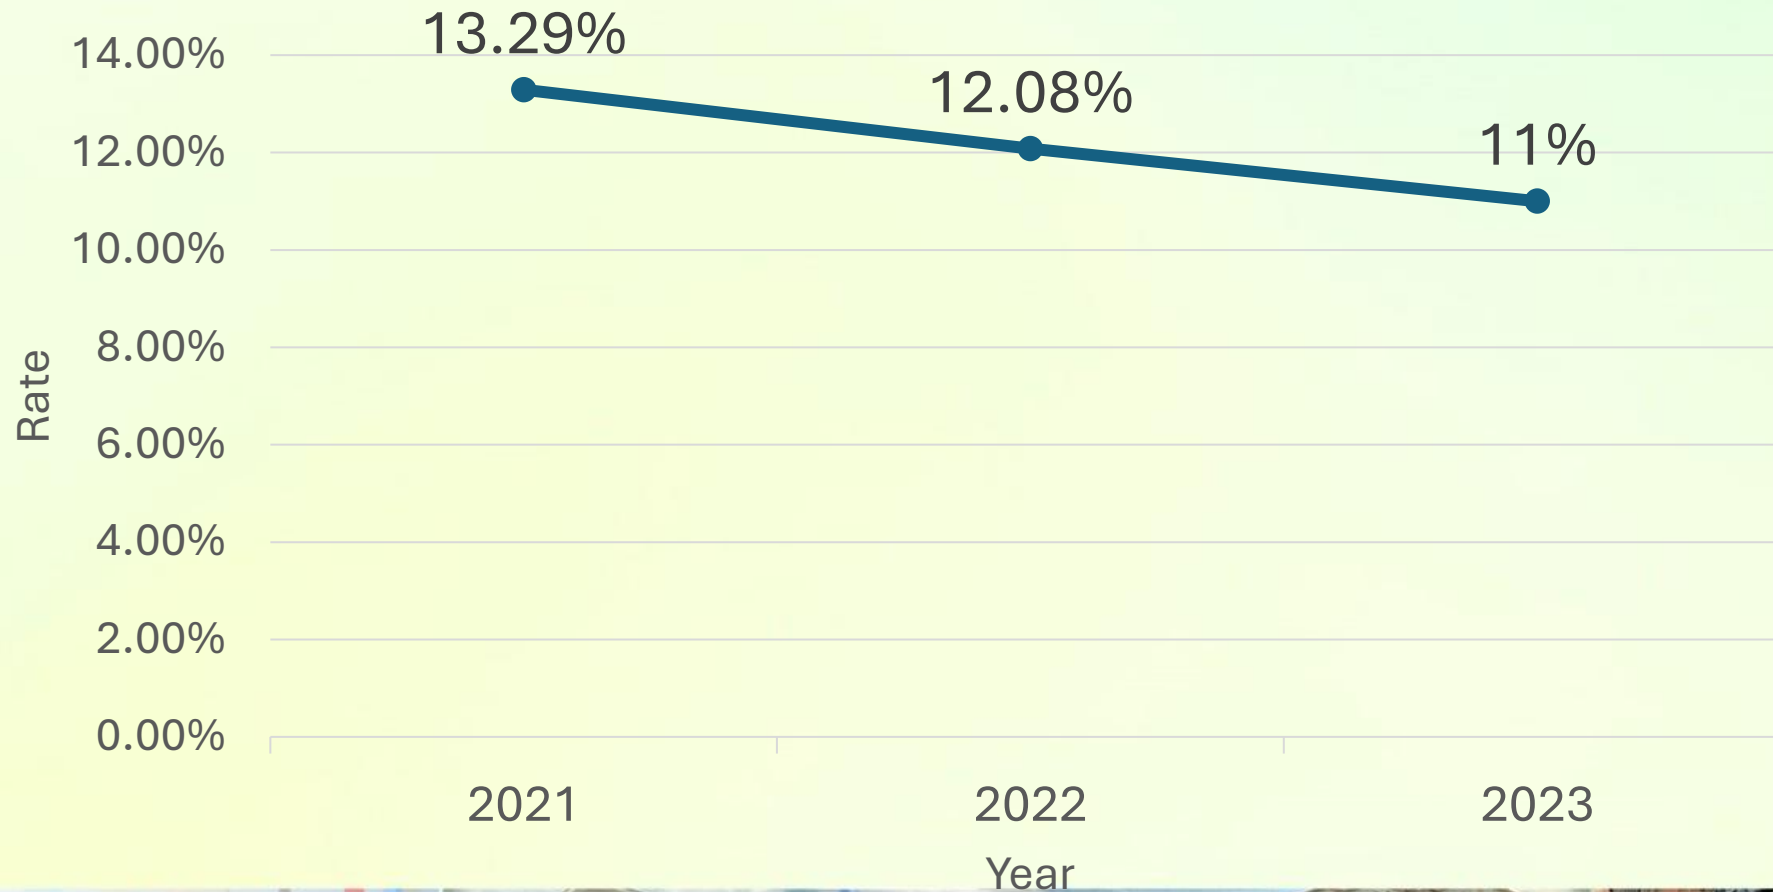

How can a learner access adolescent health services?

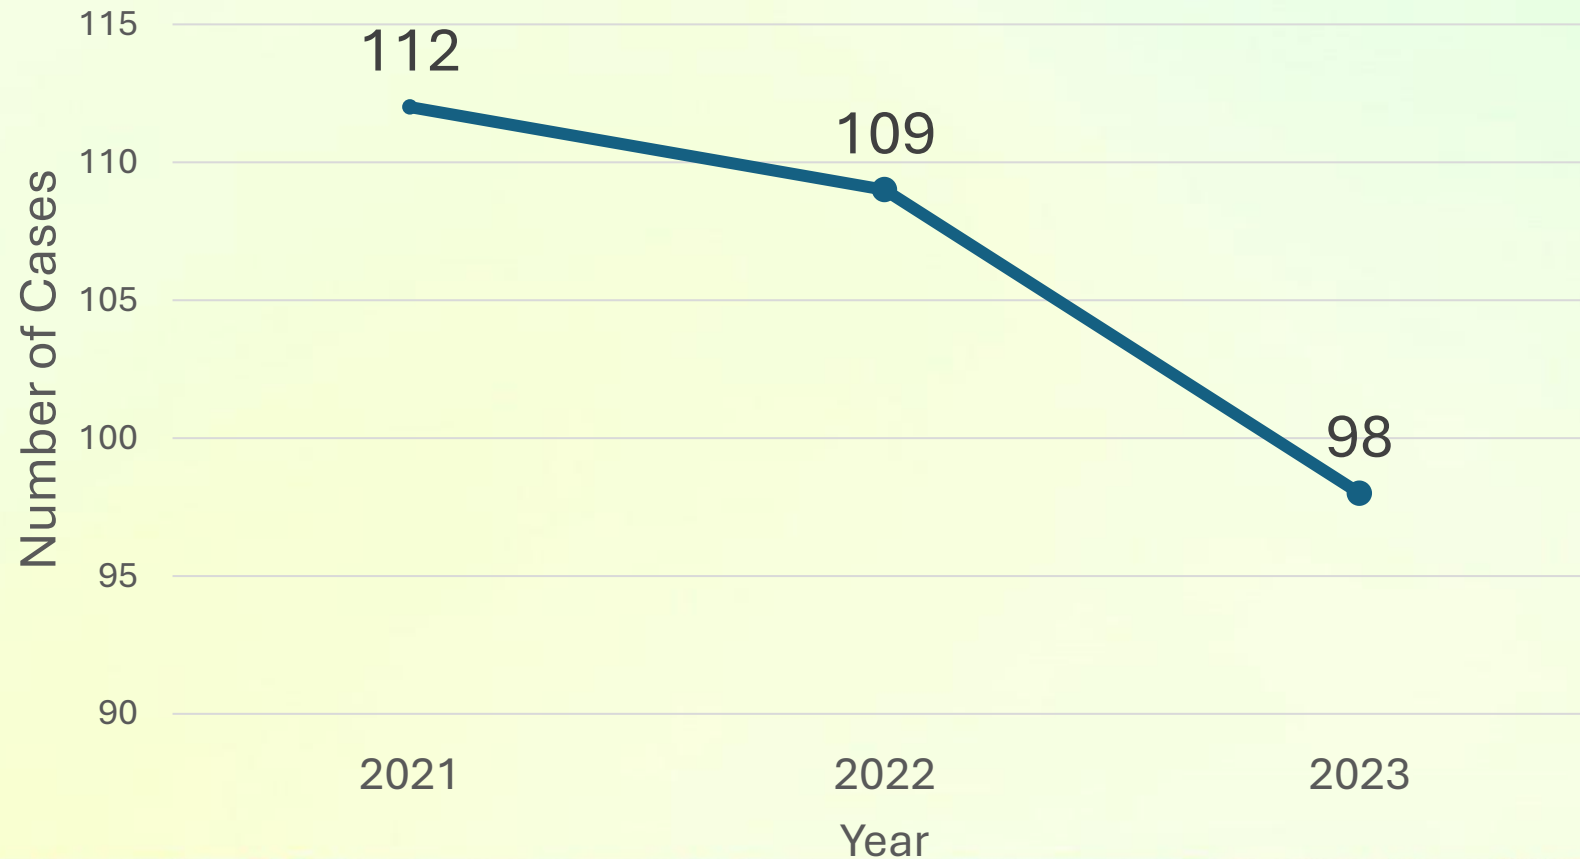

Findings

Incidence Rate of Teenage Pregnancy in the Province of Iloilo from 2021 to 2023.

Findings

Number of suicide cases in the Province of Iloilo from 2021 to 2023.

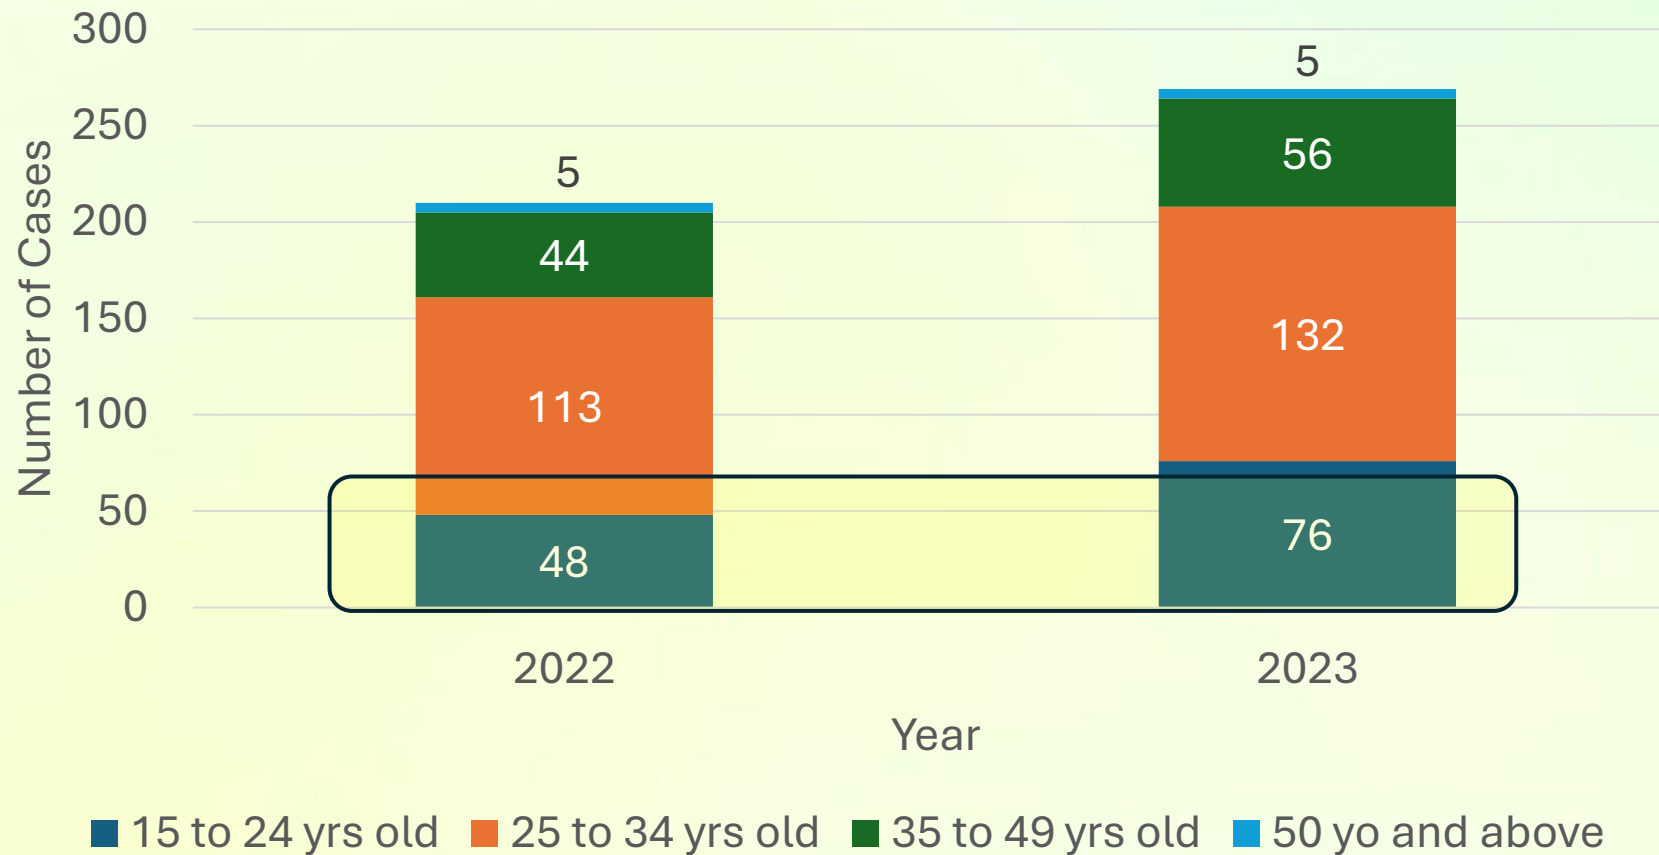

Findings

COVID-19 Vaccination First Booster Coverage for 12 to 17-Year-Olds in Iloilo Province, 2022-2023.

Findings

Age Distribution of Newly Diagnosed HIV Cases in the Province of Iloilo, 2022-2023.

Significance/Implications

- The results underscore the project's potential as an effective outreach program for addressing ongoing adolescent challenges within school settings
- Collaborative activities, such as *Project Tib-ong Kabataan*, have intensified the adolescent health campaign among partner agencies
- Local Government Units recognized the project's efficiency and impact, motivating them to adopt the same model of integrated health services for adolescents in their communities
- The data collected by the project guided LGUs in enhancing the capacity of their service providers to better meet the needs of their adolescents

Significance/Implications

- The PHO began implementing the project in the community, specifically targeting out-of-school youth, in collaboration with local officials
- The PHO hired a psychiatrist to provide expert support for the project's mental health initiatives
- The Office of the Provincial SK Federation President committed to sponsor the Provincial Integrated Service Delivery Network (ISDN) Ordinance, strengthening support for youth programs
- The DepEd SDO Iloilo mandated that all learners undergo the HEEADSSS assessment annually
- DepEd Health & Nutrition personnel and teachers are now included in PHO-led training programs, such as the *Rapid and Comprehensive HEEADSSS assessment*, *Foundational Course on Adolescent Reproductive Health*, *MHPSS*, *Non-Suicidal Self-Injury (NSSI) Protocol*, *Immunization*, etc.
